

DIEGO MEJIA

Computer Science Student

📍 Los Angeles, CA ✉️ diegom@laform.com 🐙 <https://github.com/DiegzM>  <https://www.linkedin.com/in/diego-mejia-53122a32a/>

Education

Bachelor of Science in Computer Science

May 2027 (Expected)

California State Polytechnic University, Pomona

- **GPA:** 3.8/4.0
- **Relevant Coursework:** Data Structures and Advanced Programming, Object-Oriented Programming, Intro to Cybersecurity, Database Systems, Systems Programming, Artificial Intelligence

Skills

Programming Languages: Python, Java, JavaScript, SQL, HTML/CSS

Frameworks & Libraries: PyTorch, Pandas, Node.js, React, Flask, NumPy, Scikit-learn

Developer Tools: GitHub, Git, VS Code, IntelliJ, Google Colab

Work Experience

Club Coordinator

Jan 2025 - Present

ELA Science | Pomona, CA

- **Led** science-focused after-school sessions for **15+** students (grades 4-9), with a special emphasis on fundamental computer science concepts.
- Designed a **custom curriculum** and **guided students** through hands-on activities, emphasizing problem-solving and fostering creativity.
- Used **block-based programming tools** (e.g., Scratch) and Code Maven to demonstrate coding logic.
- Boosted **student engagement**; **90%+** of students requested more programming-focused sessions.

Projects

AI Jazz Solo Generator | PyTorch, React + Flask, SQLite, Google Colab

Developed a **Transformer-based MIDI jazz generation model** trained on **400** solos from the Weimar Jazz Database and deployed it as a **React + Flask application**.

- Utilized **SQL** queries and **Pandas** functions to extract data from the online SQL Weimar Jazz Database.
- Created a **preprocessing pipeline** to remove incompatible solos and extract musical features.
- Developed a **custom chord-parser class** to parse irregular chord symbols in the dataset.
- Trained an **Encoder-Decoder Transformer** via Google Colab, fine-tuning hyperparameters and optimizing inference.
- Hosted the Flask backend on a **Raspberry Pi**, running **24/7** using systemd.

Aerodash Game | Godot, GDScript

Led an **8-person** team in designing and developing a 3D arcade aerial racer game.

- Coordinated **development** and **communication** throughout the Fall semester, managing task breakdowns.
- Implemented **aerial mechanics**, combining **drone** and **airplane** style physics.
- Developed a **responsive in-game racing GUI** and a **menu system** supporting multiple worlds.
- Delivered semimonthly **public presentations** showcasing development progress and gameplay features.
- Released the game on **Itch.io**, reaching **30+** downloads.
